

Unlike traditional POS, **pRoMiSe Spa** is the specific POS software suitably designed for spa business. It contains not only regular POS functions, but also specific functions for service requirement, such as service menu, package or course tracking, flexible payment structure, and booking system of room, staff, or service available. By reducing time of dealing with paperwork, your staffs would have more time to focus on services and customer satisfaction.

## The outstanding functions:

- **Front End Management:** Supports both product and treatment menu, and special type of payment, such as prepaid and package or course selling.
- **Staff Management:** Enable you to designate ability to do specific services for each staff and create the linkage shown up to the Front End and Reservation system.
- **Commission Setting:** Support various types of commission based on each service item or level of total sales along with summary commission report for individuals.
- **Reservation and Appointment:** Able to search the availability of specific treatment, service room, and staff on a specific date and time for booking.
